RESCO BIG A - CLEANING COMPOUND

RESCO Big A is designed to brighten aluminum and aluminum alloys. It is a balanced compound that penetrates and dissolves oxidized surface film, almost instantly restoring the aluminum surface to a bright new factory finish. Excellent for continuous maintenance of aluminum and stainless steel trailers, as well as other similar surfaces.

Sulfuric acid-based compound, combined with additional fast-acting acids, and surfactants. This brightener is highly active. Therefore, even at highly diluted concentrations, it is very capable of brightening aluminum as well as stainless steel. The high percentage of surfactants in the formulation gives the diluted forms excellent spreading characteristics, and also allows for free rinsing. This product is for use only by skilled, trained operators who want efficiency in fast production line cleaning of trailers and other aluminum surfaces.
