

## ROLLER COVERS

### MATCH THE ROLLER TO THE SURFACE

A critical element in any roller is the type of fiber used in the cover and length of the nap. Mohair covers are especially good for applying enamel; lambswool covers are excellent for alkyd paints, but not latex; synthetic fibers make all purpose covers but cannot be used with specialty coatings, such as epoxies and polyurethane.

NAP	SURFACE
1/8" - 3/6"	SMOOTH - Untextured plaster, smooth wood, wall board, drywall, metal
3/8" - 1/2"	SEMI-SMOOTH - Walls & ceilings, lightly textured drywall or wood, acoustic tile
3/4 - 1"	SEMI-ROUGH - Textured plaster or stucco, paneling, decks, concrete block
1 1/4" - 1 1/2"	ROUGH - Heavily textured plaster or stucco, rough wood, brick, corrugated metal

### 100% NATURAL MERINO SHEEP SKIN

- 100% natural Merino sheepskin roller covers
- For all latex and oil-based paints
- Single piece construction for smooth, consistent coverage
- Long lasting, 6 ply, solvent resistant core
- Hand made and inspected to ensure the finest quality
- More fibers per inch - up to 8 times more than synthetics
- Fast cleanup, increased productivity and long life

## ROLLER COVERS

### PURDY

#### COLOSSUS POLYAMIDE

Our Colossus™ series features high capacity roller covers that load and release an exceptional amount of paint. Made of an exclusive formulation of 1% polyamide, Colossus™ roller covers lay paint off very smoothly and carry a remarkable amount of material to the surface without dripping or splattering. This product rolls one-third farther than traditional lambskin roller covers and backrolls over 1, square feet – other products wear out in less than half the time. Perfect for rolling a great deal of new drywall quickly, Colossus roller covers hold and release more paint than any other Purdy roller fabric. Designed for heavy-duty painting projects. Also great for stucco, T1-11 siding, brick or rough-textured walls. The polyamide fiber holds as much paint as Lambskin yet is much more durable. Use for all latex and oil-based paints.
